

# BELLEZZA COWHIDE

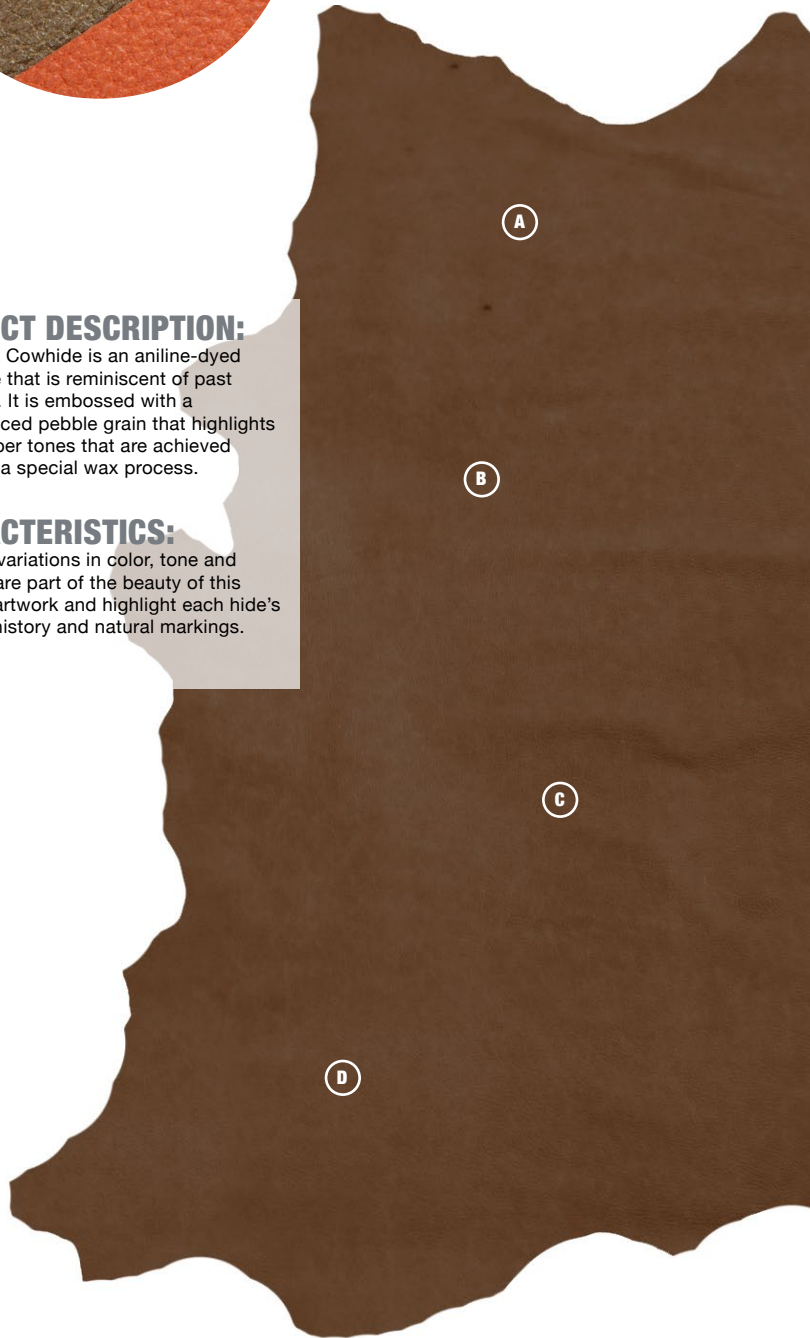

PRODUCT CHARACTERISTIC SHEET

## PRODUCT DESCRIPTION:

Bellezza Cowhide is an aniline-dyed cowhide that is reminiscent of past artisans. It is embossed with a pronounced pebble grain that highlights the deeper tones that are achieved through a special wax process.

## CHARACTERISTICS:

Natural variations in color, tone and texture are part of the beauty of this leather artwork and highlight each hide's unique history and natural markings.

**A:** Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

**B:** Leather is a natural product, therefore it may take the embossing effect differently from area to area and therefore, there will be some variation in the depth of the embossed pattern print. This variation is controlled as much as possible.

**B:** Healed wound during life of animal which is characterized by raised surface and inconsistent grain. Scars are less apparent in the Bellezza product than in Aniline leathers.

**D:** Characterized by many clearly visible blood vessels, either closed or cut open by splitting or shaving operations. Veins are less apparent in the Bellezza product than in Aniline leathers.
