

BOND COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Bold yet classic, Bond Cowhide breaks boundaries while remaining rooted in tradition. Embossed on a wax-coated pull-up leather, the linear-driven pattern ages well over time, developing a nuanced patina.

CHARACTERISTICS:

Bond is a wax pull-up leather and will burnish and patina with wear, showing scratches and other markings while in use.

As a Semi-Aniline leather, there is a only a light pigment layer added to the aniline crust to even out color and add protection. This will be a more consistent and durable leather than a full Aniline leather, however, will still exhibit variation in color, tone and natural characteristics and does not have full coverage of a pigment formula that a Finished leather does.

As an Embossed leather, there will be less natural characteristics shown on a hide due to the embossed pattern disguising many of these, but because this is a natural product, neck wrinkles, scars, and other characteristics should be expected and will vary within a hide and from hide to hide.

Bond Cowhide will exhibit natural variations in color, tone and texture that are part of the beauty of this leather. Each hide's unique history and natural markings, such as neck wrinkles, should be expected and will vary within a hide and from hide to hide.

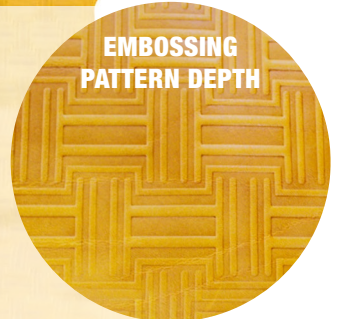

A sample of Bond Cowhide is not necessarily representative of the overall coloration, effect, and characteristics of an entire hide.

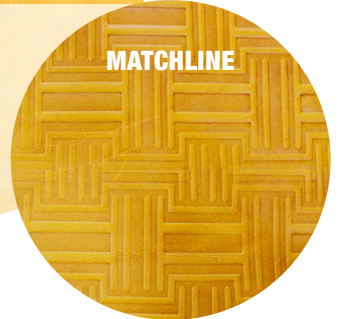

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

B: Healed wound during life of animal which is characterized by raised surface and inconsistent grain.

C: Leather is a natural product, therefore it may take the embossing effect differently from area to area and therefore, there will be some variation in the depth of the embossed pattern print. This variation is controlled as much as possible.

D: Bond Cowhide is embossed with an embossing plate. There will be a slight matchline at each point the pattern repeats down the hide and at the backbone. This is controlled as much as possible.

PRODUCT NAME	PREFIX	CATEGORY	EMBOSSED	HAND-RUBBED OR HAND-TIPPED	MACHINE-ANTIQUED	WAXED	AVERAGE THICKNESS	PERFORMANCE RATING	AVERAGE SIZE
Bond Cowhide	SG-BND	Semi-Aniline	Yes	No	No	Yes	1.0 - 1.2 mm	2.5 of 5	Whole Hides of 55 - 60 SF
