

LEATHER CLEANING PROCEDURES

Ink Marks

Treat early for best results.

- Finished Leather: Use *Ink & Stain Remover* followed by *Finished Leather Cleaner*, and then *Conditioner/Protector*.
- Aniline Leather: Rub a **white** eraser quickly and firmly over the mark. Test in an inconspicuous area in advance.

Grease

Gently lift excess grease with soft dry cloth.

- Finished Leather: Clean with *Finished Leather Cleaner* then treat with *Conditioner/Protector*.
- Aniline Leather: Sprinkle cornstarch over grease. Cover with dampened white cloth for 4-6 hours; remove cloth and cornstarch. Repeat if necessary.

Water

Let dry slowly; do not use heat guns or air dryer.

Food/Beverages

Gently blot excess spill with soft damp cloth.

- Finished Leather: Clean with *Finished Leather Cleaner* then treat with *Conditioner/Protector*.
- Aniline Leather: Dry slowly away from direct heat.

Blood/Urine

Flush from leather with clear water and soft cloth.

- Finished Leather: Clean with *Finished Leather Cleaner* then treat with *Conditioner/Protector*.
- Aniline Leather: Dry slowly away from direct heat.

Wax

Place ice cubes in plastic bag over wax until it becomes firm enough to gently lift from surface. Treat residual marks as grease.

Gum

Gently heat with hair dryer. Rub gum from surface with clean soft cloth. Treat residual marks as grease.

Note: *If these procedures do not work for you, consult a professional leather care expert.*
