PEBBLE WOVEN COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Pebble Woven is made from our aniline-dyed Mesa cowhide, burnished to create a time-worn patina and a distressed look, and woven on hand-operated antique teak looms.

CHARACTERISTICS:

Pebble Woven is sold as 54” wide goods.

1 yard is equal to 13.50 SF.

Pebble Woven is suitable for accessories, wall coverings, and upholstered applications in moderate wear areas.

Includes a light jersey backing for pattern stability and protection.

Treated with flame retardant to meet most industry standards.

Strong, resilient and will not permanently stretch or ‘bag’ when upholstered; the unique weaving technique imparts a memory that always returns to original form.

Natural variations in color, tone and texture will be visible and are part of the beauty of this leather.

A: Pebble Woven is an aniline-dyed leather with no surface pigments; there will be natural shading within a yard and from yard to yard. Current dye lot cuttings for approval are recommended with each order.
