

RAPTURE TIPPED COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Rapture Tipped Cowhide is an aniline-dyed, embossed leather with a hand-tipping that emphasizes the pronounced, pebbled grain. This creates a leather that has a depth of color and a subtle dimensional beauty.

CHARACTERISTICS:

The subtle, tone-on-tone Hand-Tipping enhances the natural look of the leather and accentuates the nice hand.

As a Hand-Tipped leather, there will be some variation in coloration and boldness of the Hand-Tipping effect within a hide and from hide to hide.

Durability and built-in protection from soiling, fading, and wear.

More consistency and less apparent defects than found in Aniline leathers.

There are no plate or match lines apparent and Rapture Cowhide is produced as whole cowhides of 55—60 SF average size.

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

B: Leather is a natural product and it may take the embossing effect differently from area to area and therefore, there will be some variation in the depth of the embossed pattern print. This variation is controlled as much as possible.

C: Rapture Tipped is a Hand-Tipped leather, therefore there will be some variation in coloration and boldness of the tipping effect within a hide and from hide to hide, due to its hand-crafted nature.
