

REGAL COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Regal Cowhide is a Finished leather and our best grade of premium cowhide with a lustrous pearlescent finish that accents perfectly the subtle antiquing effect. This leather is offered in a sophisticated and beautiful color palette, ideal for creating an alluring and chic look.

CHARACTERISTICS:

The leather receives a pearlized pigmented finish, then is machine-sprayed with an antique effect to create a pearlescent and two-tone coloration.

Because of the nature of this leather, there will be variations in color, tone, and texture; expect some variation in coloration and heaviness of the antique effect within a hide and from hide to hide. This is part of the inherent beauty of this hand-crafted and natural product.

A sample of Regal Cowhide is not necessarily representative of the overall coloration, effect, and characteristics of an entire hide.

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

B: Regal Cowhide is a pearlized and machine-sprayed antiqued leather; there will be variation in coloration and boldness of antiquing effect within a hide and from hide to hide.

C: Characterized by many clearly visible blood vessels, either closed or cut open by splitting or shaving operations.

D: Loose grain is characterized by large “breaks” in the density of the grain visible on the surface of the hide. Generally-speaking, loose grain is often found towards the perimeter of a hide.

E: Characteristic wherein the grain structure visible on the surface of the hide is more uniform and “tight.” Tight grain is generally preferred and found more consistently towards the interior of the hide.
