

SHIMMERING COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Shimmering Cowhide is made on the suede side of our genuine cowhide with a special transfer effect. The various patterns and colors available in this line provide just the right amount of textural interest and shimmer to add an unforgettable beauty to any upholstered piece or application.

CHARACTERISTICS:

Natural variations in color, tone and texture are part of the beauty of this leather artwork and highlight each hide's unique history and natural markings.

As an Aniline leather, natural variations in color and tone are part of the beauty of this natural leather and highlight each hide's unique history and natural markings.

A: Shimmering Cowhide is an Aniline leather, with no surface pigments; there will be natural color shading within a skin and from skin to skin.

B: Shimmering Cowhide defects may include natural characteristics such as small holes, crease lines, and discoloration spots. These defects are minimal but should be expected to some degree as this is a natural product.

COLOR VARIATION

DEFECTS

Many patterns and styles are available, see www.townsendleather.com and search for Shimmering Cowhide for current selections.
