

VERTUCCI DEERSKIN

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Vertucci Deerskin is aniline leather, made from the most premium, supple, and luxurious skins available; it is aniline-dyed, Hand-Rubbed genuine deerskin.

CHARACTERISTICS:

The Hand-Rubbing accentuates the inherent qualities and natural characteristics of this naturally pebble-grained leather and emphasizes the uniquely soft hand of deerskin that is truly beyond comparison.

Vertucci Deerskin does not have the full pigmented coverage of a Finished leather hide; Aniline leathers such as Vertucci Deerskin are less consistent than Finished leathers.

As an Aniline leather, natural variations in color, tone, and grain texture are part of the beauty of this natural leather and highlight each skin's unique history and natural markings.

As a Hand-Rubbed leather, there will be some variation in shading and coloration within a skin and from skin to skin.

These are small skins, averaging 9 - 11 SF in size.

A

A: Vertucci Deerskin is an Aniline leather, with no surface pigments; there will be natural color shading within a skin and from skin to skin.

B

B: Vertucci Deerskin is a Hand-Rubbed leather, therefore there will be some variations in coloration and boldness of the rubbing effect within a skin and from skin to skin, due to its hand-crafted nature.
