

ARTURO FUENTE GLAZED COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Arturo Fuente Glazed Cowhide is leather that is aniline-dyed and Hand-Rubbed to accentuate the natural beauty and unique texture of each individual hide.

CHARACTERISTICS:

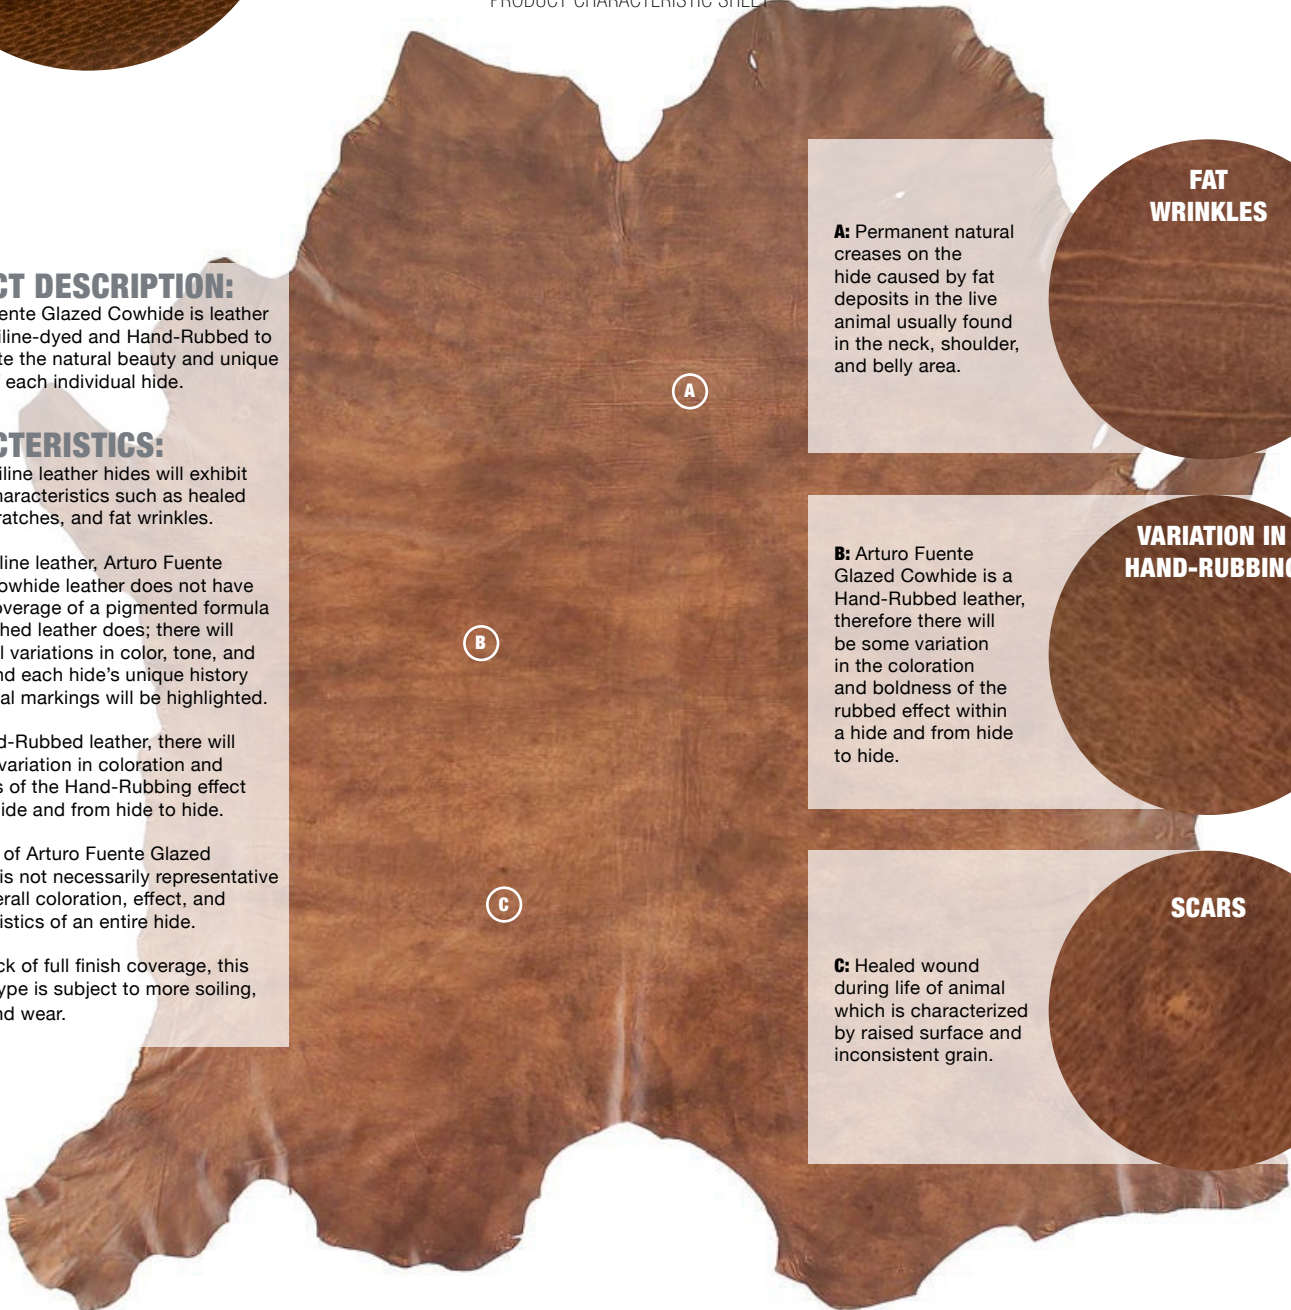

These Aniline leather hides will exhibit natural characteristics such as healed scars, scratches, and fat wrinkles.

As an Aniline leather, Arturo Fuente Glazed Cowhide leather does not have the full coverage of a pigmented formula as a Finished leather does; there will be natural variations in color, tone, and texture and each hide's unique history and natural markings will be highlighted.

As a Hand-Rubbed leather, there will be some variation in coloration and heaviness of the Hand-Rubbing effect within a hide and from hide to hide.

A sample of Arturo Fuente Glazed Cowhide is not necessarily representative of the overall coloration, effect, and characteristics of an entire hide.

Due to lack of full finish coverage, this product type is subject to more soiling, fading, and wear.

FAT WRINKLES

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

VARIATION IN HAND-RUBBING

B: Arturo Fuente Glazed Cowhide is a Hand-Rubbed leather, therefore there will be some variation in the coloration and boldness of the rubbed effect within a hide and from hide to hide.

SCARS

C: Healed wound during life of animal which is characterized by raised surface and inconsistent grain.
