

HANDIWORK COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

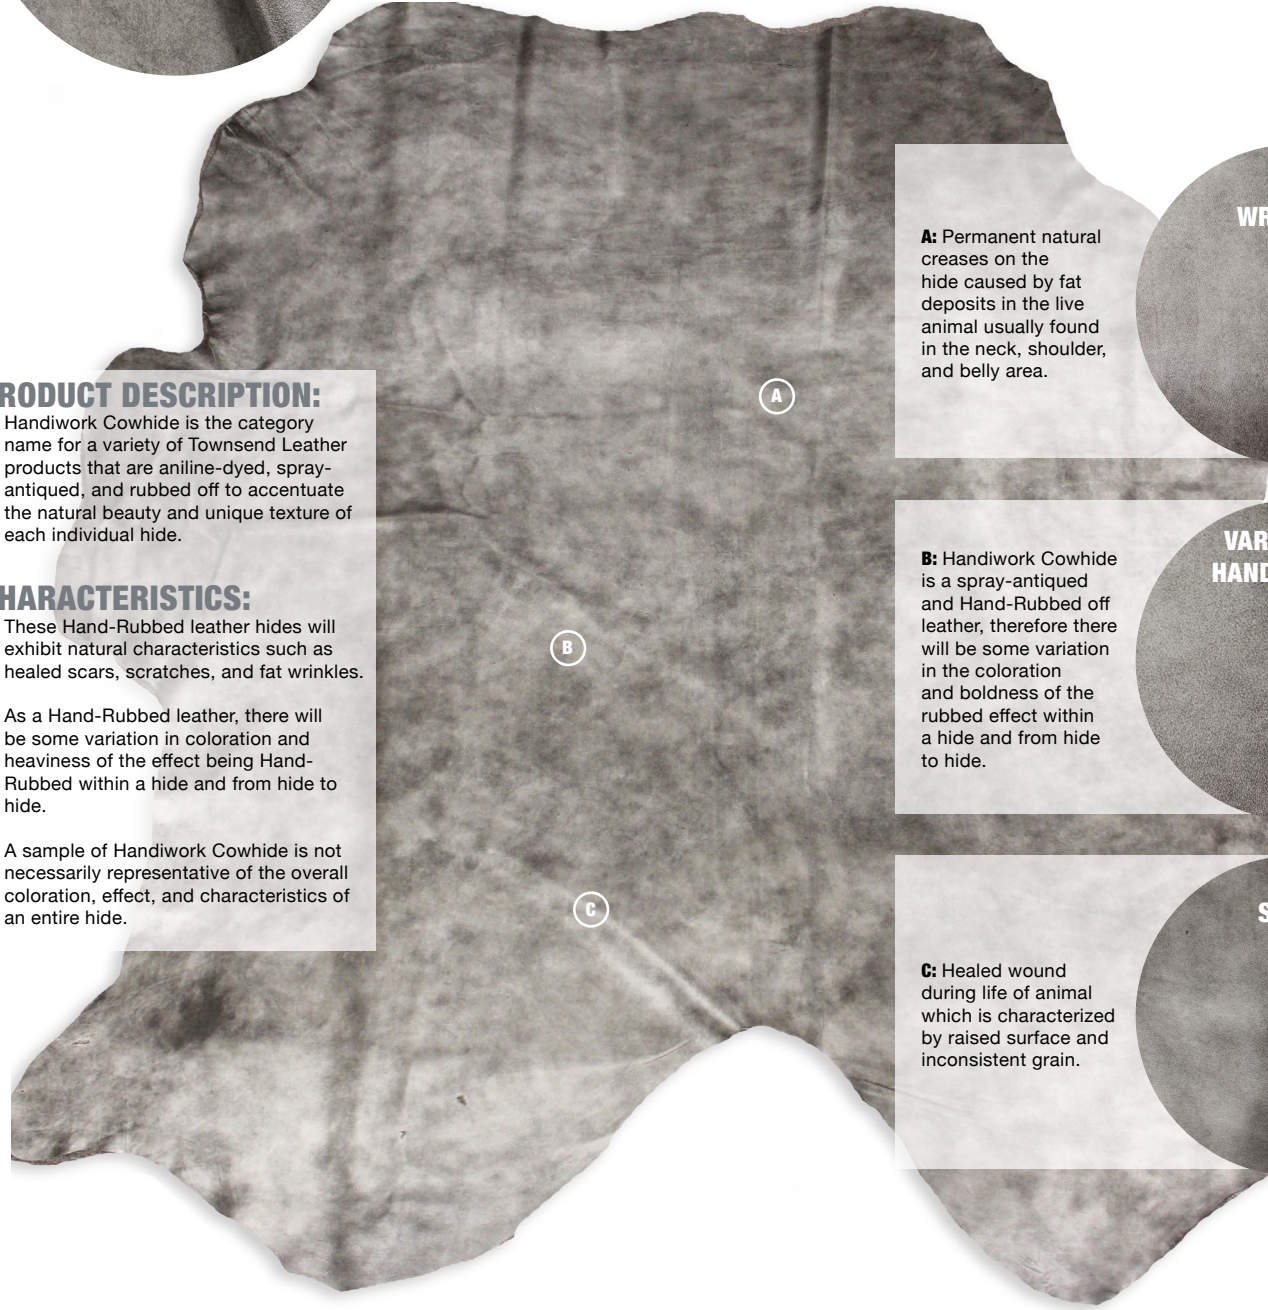

Handiwork Cowhide is the category name for a variety of Townsend Leather products that are aniline-dyed, spray-antiqued, and rubbed off to accentuate the natural beauty and unique texture of each individual hide.

CHARACTERISTICS:

These Hand-Rubbed leather hides will exhibit natural characteristics such as healed scars, scratches, and fat wrinkles.

As a Hand-Rubbed leather, there will be some variation in coloration and heaviness of the effect being Hand-Rubbed within a hide and from hide to hide.

A sample of Handiwork Cowhide is not necessarily representative of the overall coloration, effect, and characteristics of an entire hide.

FAT WRINKLES

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

VARIATION IN HAND-RUBBING

B: Handiwork Cowhide is a spray-antiqued and Hand-Rubbed off leather, therefore there will be some variation in the coloration and boldness of the rubbed effect within a hide and from hide to hide.

SCARS

C: Healed wound during life of animal which is characterized by raised surface and inconsistent grain.
