

# NUBUCK EMBOSSSED & TIPPED COWHIDE

PRODUCT CHARACTERISTIC SHEET

## PRODUCT DESCRIPTION:

Nubuck Embossed and Tipped Cowhide is an Aniline, embossed, and Hand-Tipped leather. It is made on our most select hides and is embossed with a texture that enhances the natural grain of this lightly-buffed, softly-sueded premium cowhide, helping to create a more consistent grain throughout the hide. It then receives an additional pigmented hand-tipped application to create contrast of color on top of the embossing pattern.

## CHARACTERISTICS:

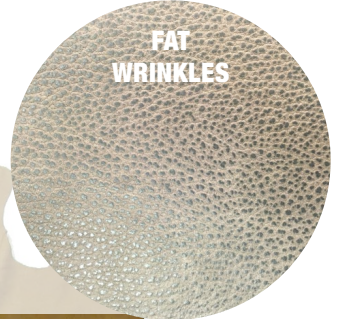

As an Aniline leather, Nubuck Embossed and Tipped does not have the coverage of a pigmented formula as a Finished leather does; there will be natural variations and in color shading within a hide and from hide to hide.

Each hide's natural markings will be highlighted. The appearance of natural markings such as the backbone, healed scars, and neck and fat wrinkles are to be expected. This is a very natural leather; the leather itself has only been minimally altered from its natural state.

As a Hand-Tipped leather, there will be some variation in coloration and boldness of the tipping effects within a hide and from hide to hide.

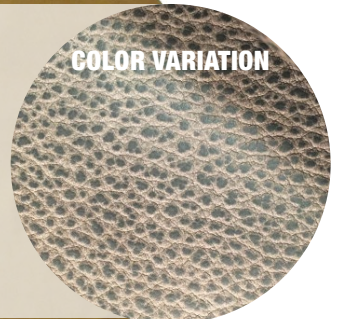

**A:** Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

### FAT WRINKLES

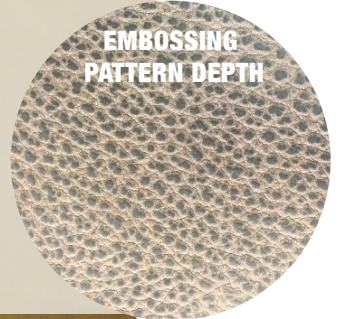

**B:** Nubuck Embossed and Tipped is an Aniline leather, with no consistent surface pigments; there will be natural color shading within a hide and from hide to hide.

### COLOR VARIATION

**C:** Leather is a natural product, therefore it may take the embossing effect differently from area to area and therefore, there will be some variation in the depth of the embossed pattern print. This variation is controlled as much as possible.

### EMBOSSING PATTERN DEPTH

**D:** Nubuck Embossed and Tipped Nubuck Cowhide is a Hand-Tipped leather, therefore there will be some variation in coloration and boldness of the tipping effect within a hide and from hide to hide, due to its hand-crafted nature.

### VARIATION IN HAND-TIPPING
