

SHIMMERING LAMBSKIN

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

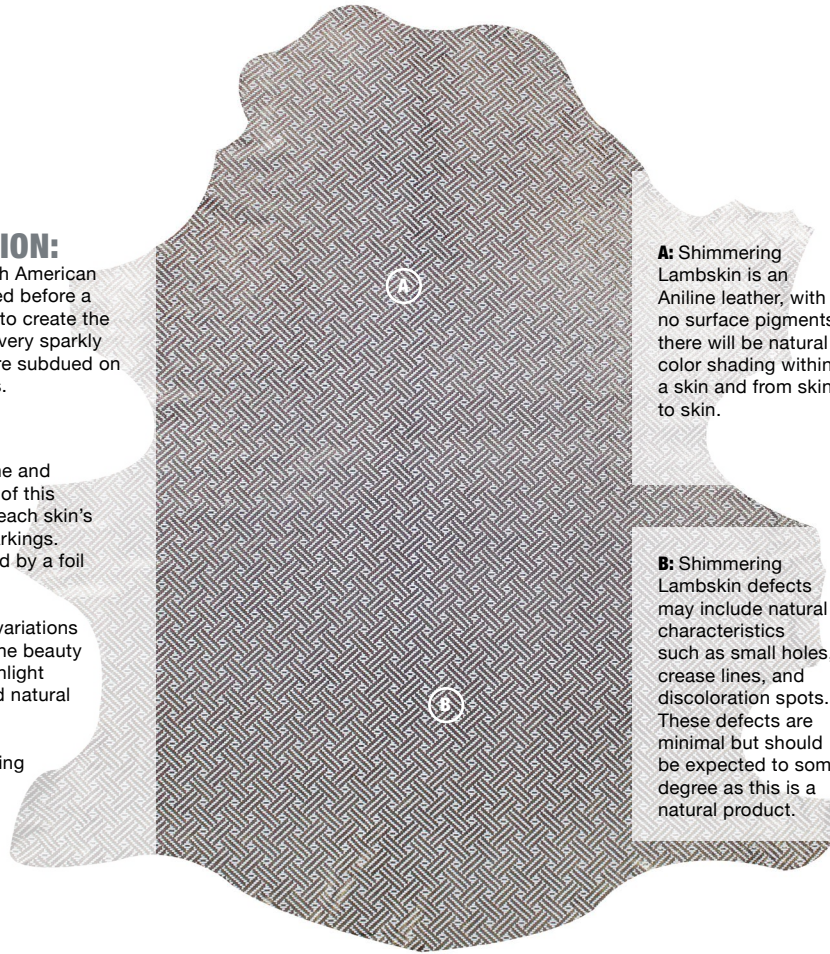

Shimmering Lambskin is North American Lambskin which is aniline-dyed before a unique foil transfer is applied to create the final look. Some patterns are very sparkly and flashy and others are more subdued on these tremendously soft skins.

CHARACTERISTICS:

Natural variations in color, tone and texture are part of the beauty of this leather artwork and highlight each skin's unique history and natural markings. The pattern has been imparted by a foil transfer.

As an Aniline leather, natural variations in color and tone are part of the beauty of this natural leather and highlight each skin's unique history and natural markings.

These are small skins, averaging 9 - 11 SF in size.

A: Shimmering Lambskin is an Aniline leather, with no surface pigments; there will be natural color shading within a skin and from skin to skin.

B: Shimmering Lambskin defects may include natural characteristics such as small holes, crease lines, and discoloration spots. These defects are minimal but should be expected to some degree as this is a natural product.
