

SUEDE COWHIDE

(SOFT SUEDE, SERENATO SUEDE, AND SIMILAR PRODUCTS)

PRODUCT CHARACTERISTIC SHEET

COLOR VARIATION

A: Suede is an Aniline leather, with no surface pigments; there will be natural color shading within a skin and from skin to skin.

PRODUCT DESCRIPTION:

Aniline-dyed, soft cowhide split suede brushed to a luxurious nap.

CHARACTERISTICS:

A special tanning process imparts limited stain resistance to this natural leather.

Natural variations in color, tone and texture are part of the beauty of this leather artwork and highlight each hide's unique history and natural markings.

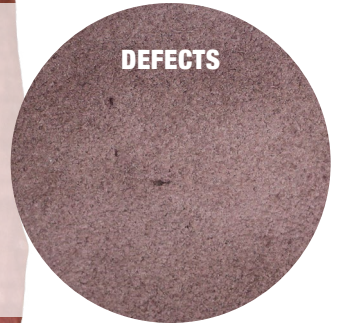

As an Aniline leather, natural variations in color and tone, are part of the beauty of this natural leather and highlight each skin's unique history and natural markings.

These are small skins, averaging 18 - 22 SF in size.

B

B: Suede defects may include natural characteristics such as small holes, crease lines, and discoloration spots. These defects are minimal but should be expected to some degree as this is a natural product.

DEFECTS

DEFECTS EXAMPLE: IRREGULAR GRAIN
