# WET LEATHER COWHIDE

PRODUCT CHARACTERISTIC SHEET

**PRODUCT DESCRIPTION:**

Wet Leather Cowhide is aniline-dyed, Finished cowhide that has been embossed with a textured grain pattern and then Hand-Tipped with a proprietary process that makes the leather glisten with a subtle, yet luminous, look.

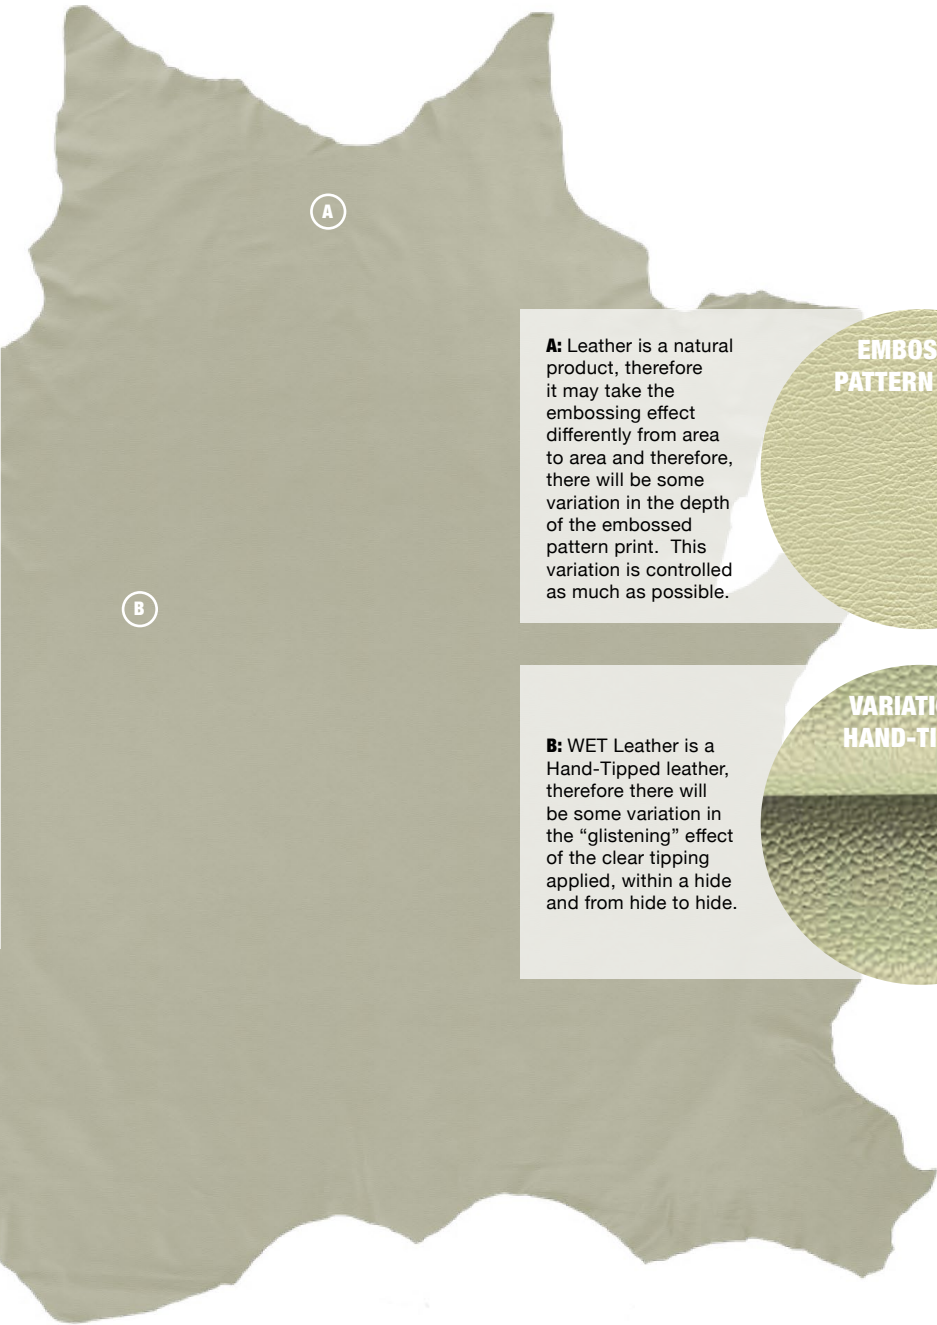

**CHARACTERISTICS:**

WET Leather is Hand-Tipped with a clear tipping and as a result, there will be some variation in the “glistening” effect within a hide and from hide to hide.

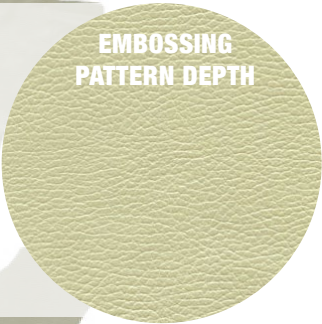

Durability and built-in protection from soiling, fading, and wear.

More consistency and less apparent defects than found in Aniline leathers.

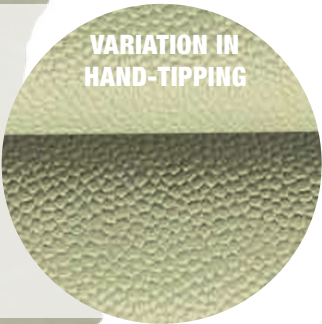

There are no plate or match lines apparent and WET Leather is produced as whole cowhides of 55—60 SF average size.

**A:** Leather is a natural product, therefore it may take the embossing effect differently from area to area and therefore, there will be some variation in the depth of the embossed pattern print. This variation is controlled as much as possible.

**B:** WET Leather is a Hand-Tipped leather, therefore there will be some variation in the “glistening” effect of the clear tipping applied, within a hide and from hide to hide.
