

EMBER COWHIDE

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

a classic embossed cowhide with a touch as soft as velvet, embodying a sense of warmth and refinement. The satin finish breathes life into the leather, radiating an understated glow that transforms as light dances across its surface

CHARACTERISTICS:

Arden Weave is a lightly finished, protected leather.

Being a natural product, Ember will exhibit some natural characteristics such as healed scars, veins, neck wrinkles, and grain variation throughout a hide and from hide to hide. However, the natural characteristics in Ember will be less obvious than in an Aniline leather.

Durability and built-in protection from soiling, fading, and wear.

More consistency and less apparent defects than found in Aniline leathers. Natural variation in grain texture throughout the hide and from hide to hide.

Townsend recommends Classic for seating and most other applications.

NECK WRINKLES

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

SCARS

B: Healed wound during life of animal which is characterized by raised surface and inconsistent grain.

COLOR VARIATION

C: Irregular color shades found within hides and/or within a dyelot.
