

# NUBUCK EMBOSSSED COWHIDE FULL HIDES

PRODUCT CHARACTERISTIC SHEET

## PRODUCT DESCRIPTION:

Nubuck Embossed Cowhide is an Aniline leather. It is made on our most select hides and is embossed with a pebbled grain that enhances the natural grain of this lightly-buffed, softly-sueded premium cowhide, helping to create a more consistent grain throughout the hide.

## CHARACTERISTICS:

As a full-Aniline leather, Nubuck Embossed does not have the coverage of a pigmented formula as a Finished leather does; there will be natural variations in grain texture and in color shading within a hide and from hide to hide.

Each hide's natural markings will be highlighted. The appearance of natural markings such as the backbone, healed scars, and neck and fat wrinkles are to be expected. This is a very natural leather; the leather itself has only been minimally altered from its natural state.

Because of its inherent characteristics, this product should be well understood by the end user.

**A:** Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

NECK/FAT  
WRINKLES

**B:** Characterized by large variation in the density of the grain visible on the surface of the hide.

LOOSE GRAIN

**C:** Inconsistent grain found in the center of the hide running along the entire length of the hide.

VISIBLE  
BACKBONE

**D:** Healed wound during life of animal which is characterized by raised surface and inconsistent grain.

SCARS

**F:** Irregular color shades found within hides and/or within a panel characterized by raised surface and inconsistent grain.

LOT COLOR  
VARIATION

**E:** Characterized by many clearly visible blood vessels, either closed or cut open by splitting or shaving operations.
