

TAPESTRY SKIVED

COWHIDE

PRODUCT DESCRIPTION AND NOTICE:

Skived Cowhide Tapestry Cowhide is Hand-Rubbed with a pigmented glaze that produces a burnished finish and accentuates the distinctive grain imparted as well as the natural character of each individual hide. It is uniquely different and accentuates the natural fine grain of goatskin, but reinterpreted on cowhide. but it has then been further processed by skiving, to reduce the thickness.

While Townsend Leather is able to provide this product, and can manufacture the highest quality option of it, a reduction in thickness is *strongly* advised against.

Townsend Leather requires acceptance of understanding and a signed Quality Waiver before proceeding with Skived Leather because of its inherent reduction of quality and increase in production time.

CHARACTERISTICS:

Being a natural product, Skived Cowhide will exhibit some natural characteristics such as healed scars, veins, neck wrinkles, and grain variation throughout a hide and from hide to hide.

Natural variations in color, tone and texture are part of the beauty of this leather artwork and highlight each hide's unique history and natural markings.

As a Hand-Rubbed leather, there will be some variation in shading and coloration within a hide and from hide to hide.

Natural variation in grain texture throughout the hide and from hide to hide.

Skived leathers have a reduced weight.

Skived leathers can only be sold in hides, not as full hides.

The visibility of natural characteristics such as scars, veins, and wrinkles will be exaggerated in skived leathers, which may result in a lower yield.

Skived leathers have a reduced Tear Strength.

Skived leathers have an increased likelihood of burn failures due to the reduction of material.

Before Townsend Leather is able to proceed with this order, we require your signature of acknowledgment and understanding of the inherent limitations of Skived Leather.

Choosing a skived leather order may result in:

- A longer than average production time
- A higher likelihood in your order failing burn tests
- A higher likelihood of visible scars, wrinkles, and veins
- A reduction of yield

I understand the inherent limitations of skived leather and still want to proceed: _____

PRODUCT NAME	PREFIX	CATEGORY	EMBOSSED	HAND-RUBBED OR HAND-TIPPED	MACHINE- ANTIQUED	WAXED	AVERAGE THICKNESS	PERFORMANCE RATING	AVERAGE SIZE
Tapestry Skived Cowhide	TC SKIV	Aniline	Yes	Yes	No	No	0.7 - 0.9 mm	4 of 5	20 - 25 SF Sides / Half Hides

A: Permanent natural creases on the hide caused by fat deposits in the live animal usually found in the neck, shoulder, and belly area.

B: Tapestry Cowhide is a Hand-Rubbed leather, therefore there will be some variation in the coloration and boldness of the rubbed effect within a hide and from hide to hide.

C: Healed wound during life of animal which is characterized by raised surface and inconsistent grain.

FAT WRINKLES

VARIATION IN HAND-RUBBING

SCARS
