DRY FLOOR SPOTLIGHT

The Dry Floor is among the first departments we photographed for our upcoming Manufacturing Magazine, which details and captures our manufacturing process from start to finish. This department encompasses numerous steps in the process to complete an order. Without the efforts of the dedicated Partners on the Dry Floor, we could not do what we do.

SHIPPING SPOTLIGHT

There's a buzz of energy and excitement in our Shipping Department as this team comes together to measure, roll, box up, and ship the beautiful leather our team has been busy making for our customers! We love to see it and appreciate them all!

The image shows the interior of a Bombardier Global 8000 private jet. The cabin is spacious and well-lit, with large windows on the right side. The seats are upholstered in light-colored leather with dark piping and have grey pillows. A dark wood table is positioned between the seats. The sidewalls are also finished with leather. The floor is covered in a light-colored carpet with a subtle pattern. The overall atmosphere is one of luxury and comfort.

TOWNSNEND FEATURE IN EVA INTERNATIONAL MAGAZINE SPRING 2026

LEATHER RINGSET

Color, character, and that perfect lived-in look. Our distressed leather ring set showcases a range of hues—smoky taupes, dark and saddle browns, deep reds and oranges, forest greens, and more—each with a buttery hand and natural variation that tells a story. Ideal for upholstery of furniture pieces that you want to be unique and have a timeless, natural appeal.

COLORING SPOTLIGHT

The second step in our manufacturing process is Coloring, the actual dyeing of the hides in preparation for the finished product. This is often referred to as aniline-dyeing. Formulas are developed for the coloring process and maintained for each order. There are strict quality controls on all dyes for compatibility with process and all other chemicals used.
